Welcome to the Creative—or Crazy — Department folder (depending on how you see our work)!

This folder serves as a repository of ideas and materials for the marketing department of Chris Corzo Injury Attorneys. The purpose of this document is to provide you with an outline and key points to remember before, during, and after using the folder for your tasks and needs.

Marketing Folder

The main folder (“Marketing”) houses three subfolders: Digital Strategy, Asset Development, and Content Strategy and Development. These folders represent the three key stages of digital campaigns and initiatives.

Digital Strategy

This folder is home to the planning, monitoring, and evaluation activities related to our digital campaigns. If you're new to the creative world of Chris Corzo Injury Attorneys, we highly recommend exploring these folders to get a solid grasp of our creative (and sometimes crazy) approach. Inside, you'll find the following folders:

- Strategic Plans and Growth Initiatives
- Brand Development
- Analytics and Performance
- Market Research and Competitor Analysis
- Resources

Click to proceed to the Digital Strategy folder.

Asset Development

This folder is not for the faint of heart or the overly judgmental—unless you’re a prosecutor or lawyer. Inside, you’ll find assets in their rawest, most unfiltered, and

unprocessed form.

- Asset Resource Center
  - Office Media Library
  - Brand Advocates Media Library
- 1 Queue
- 2 In Progress
- 3 Complete (Exported)

To keep things efficient, the subfolders in "1 Queue" and "2 In Progress" are flexible and may move back and forth based on their status.

Click to proceed to the Asset Development folder

Content Strategy and Development

The last folder in the Marketing directory, as of this writing, is Content Strategy and Development. It houses the content calendar, campaign references and pegs, execution materials, and proposal presentations.

- Content Calendar and Execution
- Content Strategy and Execution Proposals

Click to Proceed to the Content Strategy and Development Folder

Naming Convention for Asset Development

Subfolders

The subfolder naming convention within the Marketing folder is topic- or subject-based. Meanwhile, under the Asset Development folder, the format follows: [Year]_[Topic/Subject].

For example:

- 2025_Mardi Gras Spirit Challenge Entries

If there are multiple subfolders with the same subject, include a [keyword_description] after an underscore.

For example:

- 2025_Mardi Gras Spirit Challenge Entries_Cutdowns

Files for Export (For Publishing)

The files in the Export under the Asset Development folder are completed, approved, and ready-for-publishing assets. The naming format for exported assets is: [MM][DD][YY]_[Subject/Topic]_[Platform]_[Keyword_Description]

For example:

- 022525_Mardi Gras Spirit Challenge Winner Cutdown_Meta_Queue
- 022525_Mardi Gras Spirit Challenge Winner Cutdown_Meta_In Progress
- 022525_Mardi Gras Spirit Challenge Winner Cutdown_Meta_Export

If the asset is intended for all platforms, use “All”.

For example:

- 022525_Mardi Gras Spirit Challenge Winner Cutdown_All_Export

If there are multiple versions, add [format_version] after an underscore.

For example:

- 022525_Mardi Gras Spirit Challenge Winner Cutdown_Meta_In Progress_1
- 022525_Mardi Gras Spirit Challenge Winner Cutdown_Meta_In Progress_2

For multiple versions of a file, add a [lowercase letter] immediately after the [format_version].

For example:

- 022525_Mardi Gras Spirit Challenge Winner Cutdown_Meta_In Progress_1a
- 022525_Mardi Gras Spirit Challenge Winner Cutdown_Meta_In Progress_1b

Assets in the 3 Complete (Exported) folder are ready to be published.

Naming Convention for Digital Strategy and Content Strategy and Development

Subfolders

The subfolder naming convention within these folders is topic- or subject-based.

For example:

- Analytics and Performance
- Brand Development

Nested-Folder (Level 2) for Routine Files

The format for nested-folders is: [Year]

For example:

- Analytics and Performance
  - 2025

Nested-Folder Level 3 for Routine Files

The fomat for nested-folders is: [Year in Order] [Month].

For example:

- Analytics and Performance
  - 2025
    - 01 January
    - 02 February

Files for Archiving (Records/Artefacts)

The files in the Digital Strategy and Content Strategy and Development folders are for archiving. The naming format is as follows: [Document Type]_[Subject/Topic]_[Keyword_Description]

For example:

- PPT_Mardi Gras Spirit Challenge_Report

Note for Routine Files Nested-Folder (Levels 4 and higher)

- Try to keep folder structures to a maximum of three levels. If you need more, consider reorganizing the content and using a clearer topic at Level 2 instead.
